

eMarketer Updates US Time Spent with Media Figures

Posted by [Derek A. Lackey, Editor](#) / October 09, 2017

Adults will spend nearly half of their media day consuming digital content

Individuals in the US still manage to spend the equivalent of half a day consuming media. eMarketer estimates that adults will spend an average of 12 hours, 1 minute per day with major media in 2017. People have become more efficient at multitasking, thanks largely to mobile devices (excluding voice), which will take up more than one-quarter of total media time.

Those are just some of the conclusions from eMarketer's new report, *US Time Spent with Media: eMarketer's Updated Estimates for 2017*. (Subscribers to eMarketer PRO can access the [report here](#). Nonsubscribers can [access here](#).)

eMarketer counts each minute of media consumption time regardless of whether it's simultaneous with any other media. Therefore, total media consumption time continues to grow, even as the number of hours in a day remains the same.

For example, an hour spent watching TV while simultaneously using a smartphone counts as an hour of usage for each medium, and therefore as 2 hours of overall media time. In 2017, the average US adult will spend an additional 2 minutes per day with media over figures from 2016, and 24 minutes more than was spent in 2012.

Multitasking via mobile is primarily responsible for the overall increase in time spent with media. Consumers are spending more of their time on mobile devices conducting attention-heavy activities like video viewing and mobile gaming, but also with less visual activities like audio listening that enable continuous media intake. US adults will spend 3 hours, 17 minutes per day on non-voice mobile activities in 2017, an increase of more than an hour since 2013.

Average Time Spent per Day with Major Media by US Adults, 2017
hrs:mins

Note: ages 18+; time spent with each medium includes all time spent with that medium, regardless of multitasking; for example, 1 hour of multitasking on desktop/laptop while watching TV is counted as 1 hour for TV and 1 hour for desktop/laptop; numbers may not add up to total due to rounding; *excludes digital; **includes all internet activities on desktop and laptop computers
